TECHNICAL SKILLS

AI & AUTOMATION

N8N Automation | AI Agents & LLMs | Prompt Engineering | Workflow Design | Machine Learning

DEVELOPMENT & APIS

Python | FastAPI | REST APIs | JavaScript | React.js | HTML / CSS

DATA & DATABASES

Web Scraping | SQL / MySQL | Data Extraction | Data Analytics

TOOLS & INTEGRATION

Git / GitHub | MS Office | Workday Payroll Int.

LANGUAGES

English: Professional Proficiency

Urdu: Native / Bilingual

KEY COMPETENCIES

Complex Problem Solving | System Architecture | Cross-functional Teamwork | Time Management

Ahmed Shehzad

AI ENGINEER • PYTHON DEVELOPER • AUTOMATION SPECIALIST

Live Portfolio: my-portfolio-gamma-ashen-6kcsqp713c.vercel.app

PROFESSIONAL SUMMARY

Proactive and results-driven **AI Engineer & Automation Developer** with proven expertise in building intelligent systems, scalable workflow automations (n8n), and robust Python backend services. Experienced in engineering multi-step AI agents, web scraping architectures, and REST API integrations that bridge artificial intelligence with practical enterprise operations. Passionate about architectural scalability, data precision, and continuous technology innovation.

WORK EXPERIENCE

Senior AI Engineer & Automation Developer
Sep 2025 – Present

Self Employed • Islamabad, Pakistan (Remote)

- Architect and deploy intelligent agents and scalable automation systems using Python and modern AI platforms.
- Design modular n8n workflow systems utilizing Main & Sub-Workflow patterns for automated CRM and lead operations.
- Integrate third-party RESTful APIs, LLM providers (Anthropic, OpenAI), and webhook handlers for end-to-end automation.

Web Scraping Developer
Jun 2025 – Present

Linkamber • Remote

- Develop automated Python scraping scripts and extraction pipelines to collect and clean structured business data.
- Implement automated scheduling, data verification routines, and error handling for high reliability and throughput.

Resource Person (RP)
Jul 2024 – Jul 2025

NRSP (National Rural Support Programme) • British Council

- Facilitated technical learning sessions and community youth empowerment training programs.
- Mentored participants in practical digital skills, teamwork execution, and structured problem solving.

FEATURED PROJECTS

Email Verifier Tool — GitHub ↗

Python application verifying email deliverability via MX lookup, syntax validation, and SMTP checks to reduce bounce rates.

n8n Intelligent Automation — Portfolio ↗

Multi-node automated pipeline integrating AI models, CRM sync, and automated lead processing with custom error recovery.

EDUCATION

Bachelor of Science in Computer Science (BSCS)
Jun 2024 – Present

Abdul Wali Khan University • 6th Semester (In Progress)

Focus: Algorithms, Relational Databases (SQL), Software Engineering, Web Scraping & AI Fundamentals.

CERTIFICATIONS & ACHIEVEMENTS

Student Innovation Award (Aug 2024)
Appreciation Award at JMC Level for developing an innovative technical project.

n8n Automation & GTM (Sep 2026)
Professional Certification by Linkamber • ID: crd_pOf2UbHzb.

AI Fundamentals Trainee
HP LIFE / HP Foundation • Core AI Systems & Real-world Applications.

Web Development Certification
SafeX Solutions (Jun 2026) • ID: Q5$m8i#31@X%L6.
